

Vulnerability Management Service

Discover, assess and prioritize vulnerabilities in real-time across your entire network through a combination of external and internal scans, plus on-demand information when needed.

Actionable Risk Exposure Data

KNOW WHAT'S CONNECTED

Detect and Classify All Networked Assets

Regular internal and external network discovery scans map all assets on a network, providing a clear view into your entire security footprint.

KNOW WHAT'S VULNERABLE

Identify Vulnerable Assets

Automated monthly or weekly scans provide valuable information on all network assets as well as key perimeter security information. Information is correlated with data from your other services and technology, giving you a fuller picture of where to focus your resources. Plus, you can access real-time, high-level reporting in Nuspire's software-enabled operations platform, myNuspire.

KNOW WHAT MATTERS

Prioritize by Highest Risk and Easy Fixes

Vulnerability scoring in every report simplifies remediation, highlighting and prioritizing the risks you should focus on first.

SERVICE COMPONENTS

- SmartStart onboarding, including professional setup of vulnerability scanning infrastructure
- Internal vulnerability scanning (IVS) with authentication
- External vulnerability scanning (EVS)
- On-demand scanning for all vulnerabilities or targeted to a specific known vulnerability
- Risk-rated reports customized and automated plus real-time, high-level reporting view in myNuspire portal
- Client support for reporting

Vulnerability Management | Service Benefits

PROTECTION

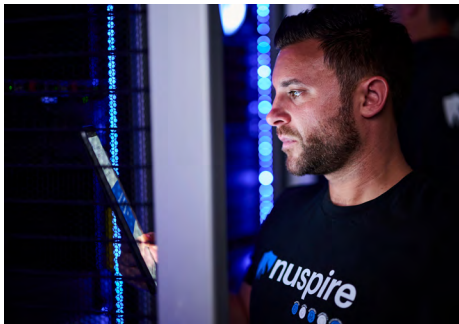

- Evaluate risk for all network assets with both internal and external scans
- Identify network and perimeter vulnerabilities
- Address compliance requirements for various frameworks
- Assess risks introduced by new assets
- Investigate risks by vulnerability

VISIBILITY

- See what bad actors see
- Access risk-rated reporting to identify and prioritize high-risk areas and low hanging fruit
- Receive regular automated scans and provide information that can be shared to all levels of the organization
- Request on-demand scans
- View real-time, at-a-glance reporting via myNuspire

EXPERTISE

- Deploy service that's customized to your environment
- Receive prioritized remediation recommendations tailored to your business model
- Scale service to any size environment

Simplicity

- Automated monitoring seamlessly tracks assets to provide consistent, actionable insights
- Helps focus and action on high priority risks
- Tailored to technical and executive audiences
- Helps demonstrate compliance with regulatory mandates or company policy

Nuspire is a leading managed security services provider (MSSP) that is revolutionizing the cybersecurity experience by taking an optimistic and people first approach. Our deep bench of cybersecurity experts, world-class threat intelligence and 24x7 security operations centers (SOCs) detect, respond and remediate advanced cyber threats. We offer comprehensive services that combine award-winning threat detection with superior response capabilities to provide end-to-end protection across the gateway, network and endpoint ecosystem. Our client base spans thousands of enterprises of all sizes, across multiple industries, and achieves the greatest risk reduction per cyber-dollar spent. At Nuspire, we are laser focused on delivering an extraordinary cybersecurity experience that exceeds client expectations.
