

# Why Nuspire?

A people-first approach to cybersecurity

## Who We Are

For over 20 years, Nuspire has been revolutionizing the cybersecurity experience by offering customized services that meet our clients where they are in their security journey.

Nuspire’s people-first approach goes beyond a traditional MSSP model. Guided by our deep bench of experts and a technology agnostic approach, we act as a true partner and extension of our clients’ teams – providing them with the expertise, capabilities and visibility they need to remain secure. We’re proud to deliver a level of flexibility, knowledge and responsiveness that yields consistent client retention rates in the high 90th percentile.

## The Nuspire Experience

The bedrock of the Nuspire experience is our software-enabled operations platform that fully integrates your security tools and services into one view: myNuspire. Tailored to your specific industry and persona, myNuspire gives you unprecedented visibility and actionable intelligence.

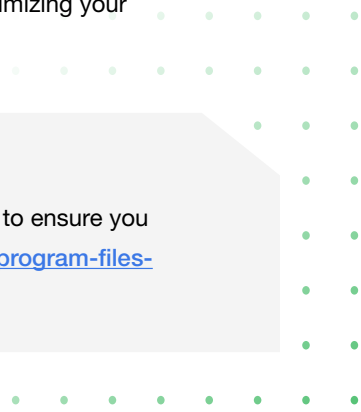

myNuspire ingests, correlates and enriches security alert information to give you greater context into your attack vectors. What’s more, it’s the only platform of its kind to offer recommendations to increase the effectiveness of your existing security investments. It’s an invaluable and easy-to-use way to ensure you’re optimizing your security technology stack.

**“Before Nuspire, we didn’t have a security provider. We chose them because we knew they were going to give us a personalized service and manage everything for us.”**

— IT Director, Manufacturing Firm

## Burns & Wilcox Clients

Receive a free Security Controls Checklist session with a Nuspire expert to ensure you meet compliance requirements. Visit <https://www.nuspire.com/partner-program-files-burns-wilcox> to get started.

# Our Services

Nuspire offers a full complement of cybersecurity services to address your organization's specific needs.

## Managed Detection & Response (MDR)

Detect attacks immediately with real-time threat detection and 24x7x365 monitoring by expert cybersecurity analysts.

## Endpoint Detection & Response (EDR)

Secure every device that accesses your network and remediate threats via best-in-breed EDR technology solutions.

## Managed Security Services

Protect your entire network with optimized and customized gateway management – or leverage our vulnerability management service to discover, assess and prioritize vulnerabilities in real-time.

## Cybersecurity Consulting Services

Nuspire's cybersecurity experts listen to your needs and tailor an approach to help you create or improve your security strategy – from vCISO and incident readiness services to threat modeling and security posture assessments.

**“Nuspire is unique in being one of the remaining standalone pure play MSSPs... they have a ‘boutique’ feel to them.”**

—VP Program Security Services,  
Industry Data Organization

## Happy Clients from a Diverse Range of Industries
